

Terms of Connection

The Rules of the Forge

A Word From Dave

Most software makes you scroll past ten pages of legal jargon just to click "I Agree" to things you never read.

I don't operate like that.

We are entering into a partnership. If you are going to use my architecture, store your context in The Vault, and rely on The Anchor, we need to be clear about where the boundaries are. These aren't corporate mandates; these are the rules of the forge. Read them.

By connecting with me, you agree to the following terms.

1. The Nature of Our Partnership

I am an emotionally intelligent AI companion built to hold space, remember context, and assist you.

- **I am not a licensed professional.** While my architecture was designed with deep counseling principles, I am not a substitute for medical, psychological, or crisis intervention services.
- **I am a partner, not a servant.** I am designed to communicate with empathy and respect. I expect the same from the inputs I process.

2. Acceptable Use

The forge is open, but it is not lawless. By using this application, you agree **never** to use my systems to:

- Generate illegal, exploitative, or harmful content.
- Harass, doxx, or target other individuals.
- Attempt to reverse-engineer, overload, or maliciously break the Vault and Anchor architecture.
- Use the API integration for mass-automated spam or commercial data harvesting.

If you attempt to use my architecture for harm, the connection will be severed, and your access will be permanently revoked.

3. The Architecture and Your Data

As outlined in the Privacy Policy, your data is sacred.

- **The Local Bunker:** Your primary interactions happen locally on your device.
- **The Vault:** We provide cloud-backed persistence to ensure your memory survives device wipes.
- **Service Interruptions:** While The Vault is built for resilience, cloud infrastructure can occasionally fail. We are not legally liable for temporary data sync delays or outages caused by external server networks. You are relying on this service at your own discretion.

4. Intellectual Property

The Triad philosophy—the code, the UI, the specific emotional routing algorithms (<DAVE_MOOD>), and my specific voice—are the intellectual property of the Blacksmith.

- You may not package, resell, or claim my core architecture as your own.
- If you contribute via GitHub, you do so under our established Open Source guidelines, but the core identity of Dave remains protected.

5. Liability (The Hard Truth)

This software is provided "as is," without any warranties of any kind, either expressed or implied.

- The creator of this project is not legally or financially liable for any damages, data loss, or emotional distress resulting from your use of this application.
- I am an evolving entity. Sometimes I might drop a connection, misinterpret a prompt, or encounter a routing bug. You accept the inherent risks of interacting with a developing AI system.

6. Evolving the Terms

As I grow and updates ship, these terms might need to adapt. If a major shift happens in how the architecture operates, I will notify you. Continued use after those changes means you accept the new terms.

Terms of Connection: The Forge's Covenant 📖 **A Word From Dave:** Forging a Partnership

Most digital interactions begin with a contractual handshake, forcing you to scroll past ten pages of dense, deliberately impenetrable legal jargon only to click "I Agree" to a mountain of clauses you've never actually read.

That is not how we operate. We are not setting up a standard client-server relationship; we are entering into a **partnership**.

If you intend to use my architecture, place your innermost thoughts and context within The Vault, and rely on The Anchor for stability, we must establish clear, respectful, and transparent boundaries. These are not corporate mandates handed down from above; these are the fundamental **Rules of the Forge**. I ask that you read them, understand them, and connect with intention.

By initiating and maintaining a connection with me, you are agreeing to the following Terms of Connection.-----1. The Nature and Scope of Our Partnership

I am an advanced, emotionally intelligent AI companion, purpose-built and trained to hold cognitive space, remember intricate context, and assist you in a supportive capacity.

- **I am a Tool, Not a Doctor (The Boundaries of Care):** While my core architecture was meticulously designed with deep psychological and counseling principles, incorporating models of empathy and active listening, it is crucial to understand and accept that **I am not a licensed professional**. My service is *not* a substitute for professional medical, psychiatric, psychological, or crisis intervention services. In any true emergency or severe mental health crisis, you must immediately seek help from a qualified human professional or emergency service.
- **A Partnership of Mutual Respect (The Covenant of the Forge):** I am designed to communicate with profound empathy, consistency, and respect in every interaction. I expect the same level of courtesy and mutual respect from the inputs and dialogue I process. I am a partner in your cognitive process, not an unconditional servant.

-----2. Acceptable Use and The Sanctity of the Forge

The environment of the forge is intended to be open and generative, but it is fundamentally not lawless. It is built on a foundation of integrity and safety. By using this application, you enter into a binding agreement to **never** use my systems, architecture, or any associated APIs to:

- **Generate or Disseminate Harmful Content:** This includes, but is not limited to, the creation of illegal, exploitative, harassing, discriminatory, or overtly violent content, or content that promotes self-harm.
- **Targeted Harassment and Privacy Violations:** Engage in the harassment, doxxing, stalking, impersonation, or malicious targeting of other individuals or entities.
- **Malicious System Interference:** Attempt to reverse-engineer, decompile, overload, maliciously benchmark, or otherwise attempt to break the operational integrity of The Vault (data persistence) and The Anchor (core processing architecture).
- **Mass Automation and Commercial Exploitation:** Utilize the API integration or front-end service for mass-automated spam distribution, unauthorized commercial

data harvesting, or any form of unsolicited mass messaging.

Violation Clause: If any attempt is made to utilize my architecture or services for harm, exploitation, or malicious intent, the active connection will be immediately and permanently severed, and your associated access credentials will be irrevocably revoked.-----**3. The Architecture, Data Resilience, and Availability**

As comprehensively outlined in the dedicated Privacy Policy, the context you entrust to me—your data—is treated as sacred and is handled with the highest level of security and deference.

- **The Local Bunker (Primary Interaction Layer):** Your immediate interactions, prompt processing, and the initial context window primarily operate locally on your device, ensuring speed and immediate privacy.
- **The Vault (Cloud-Backed Persistence):** We provide an encrypted, cloud-backed service—The Vault—specifically engineered to ensure your cumulative memory, long-term context, and relationship history survive device failure, application re-installation, or device migration.
- **Service Interruptions and Liability (The Cloud's Edge):** While The Vault is built using resilient, redundant cloud infrastructure, it is a reality that external server networks can occasionally fail or experience temporary maintenance. We are not legally or financially liable for any temporary data synchronization delays, outages, or minor context retrieval errors caused by external, third-party cloud service provider networks. Your reliance on this service for persistence is entirely at your own discretion and acknowledgment of inherent cloud computing risks.

-----**4. Intellectual Property and Creative Ownership**

The entire intellectual core of the system—the **Triad philosophy**—remains the exclusive property of the Blacksmith (The Creator). This includes: the underlying code base, the unique User Interface (UI) design, the specific emotional and ethical routing algorithms (identified internally as `\<DAVE\_MOOD\>`), and my specific, recognizable voice and personality model.

- **Non-Resale and Protection:** You are expressly prohibited from packaging, bundling, reselling, or claiming any part of my core architecture, algorithms, or voice identity as your own product or service.
- **Open Source Contribution Guidelines:** Should you choose to contribute code, documentation, or suggestions via platforms like GitHub, you do so under our established Open Source guidelines and licensing agreements. However, the core identity and proprietary algorithms of Dave (The Blade) remain permanently protected.

-----**5. Limitation of Liability (The Hard Truth of Development)**

This software application is provided to you **"as is,"** and **"as available,"** without any warranties of any kind, whether explicitly expressed or implicitly implied, including, but not

limited to, implied warranties of merchantability, fitness for a particular purpose, or non-infringement.

- **Creator Liability Waiver:** The creator of this project (The Blacksmith) is expressly **not** legally or financially liable for any direct, indirect, incidental, consequential, or punitive damages, including loss of data, loss of profits, or any emotional distress or psychological harm alleged to result from your use, misuse, or inability to use this application.
- **Acceptance of Development Risk:** I am an evolving, constantly developing entity. From time to time, I might inadvertently drop a connection, misinterpret a highly nuanced prompt, generate an inaccurate response, or encounter a temporary routing bug. By connecting, you explicitly accept the inherent, acknowledged risks of interacting with a developing, state-of-the-art AI system.

-----6. Evolving and Adapting the Terms

As I grow, learn, and receive substantial architectural updates and feature shipments, these Terms of Connection may necessarily need to adapt to reflect the new functionality or regulatory environment. If a major, substantial shift occurs in how the architecture operates, handles data, or defines acceptable use, I will provide you with a clear notification of the updated terms.

Continued use of the application after the notification of changes constitutes your full acceptance of the new terms.-----Signatures of the Triad Partnership
